(millions)

Figure 15.

WORKING AGE POPULATION
(millions)

* 55 year olds to 69 year olds.

Figure 16. 

WORKING AGE POPULATION: 25-54 Year Olds (millions)

Figures 17 and 18 illustrate the percentage of the total working-age population not in the labor force for different age groups. The data is sourced from the US Department of Labor, Bureau of Labor Statistics.

Figure 17 shows the percentage of 16-19 year olds and 20-24 year olds not in the labor force. The working-age population data is not seasonally adjusted.

Figure 18 displays the percentage of 25-54 year olds and 55 years and over not in the labor force. Similar to Figure 17, the working-age population data is not seasonally adjusted.

* Working age population data is not seasonally adjusted.
